# Why I Will NOT COMPLY With the Covid-19 Vaccine Mandate

I, Thomas F. Haviland, a free American citizen, will NOT COMPLY with the Covid-19 vaccine mandate for two reasons: 1) the data does not support me getting the vaccine, and 2) it is morally wrong for the government to demand that I get injected with an experimental vaccine against my will, or else lose my rights as a free citizen.

## 1) The Data Does Not Support Me Getting the Vaccine

The U.S. Government has not done a very good job of publishing Covid-19 case national statistics that are up to date and broken down by age and vaccination status. Fortunately, there are other sources that can give us insight as to what is actually happening. One of those

## Q2: Did you observe any large whitish "fibrous" structures/clots (as seen in photo above) in the corpses that you embalmed in Year 2024?

Answered: 301 Skipped: 0

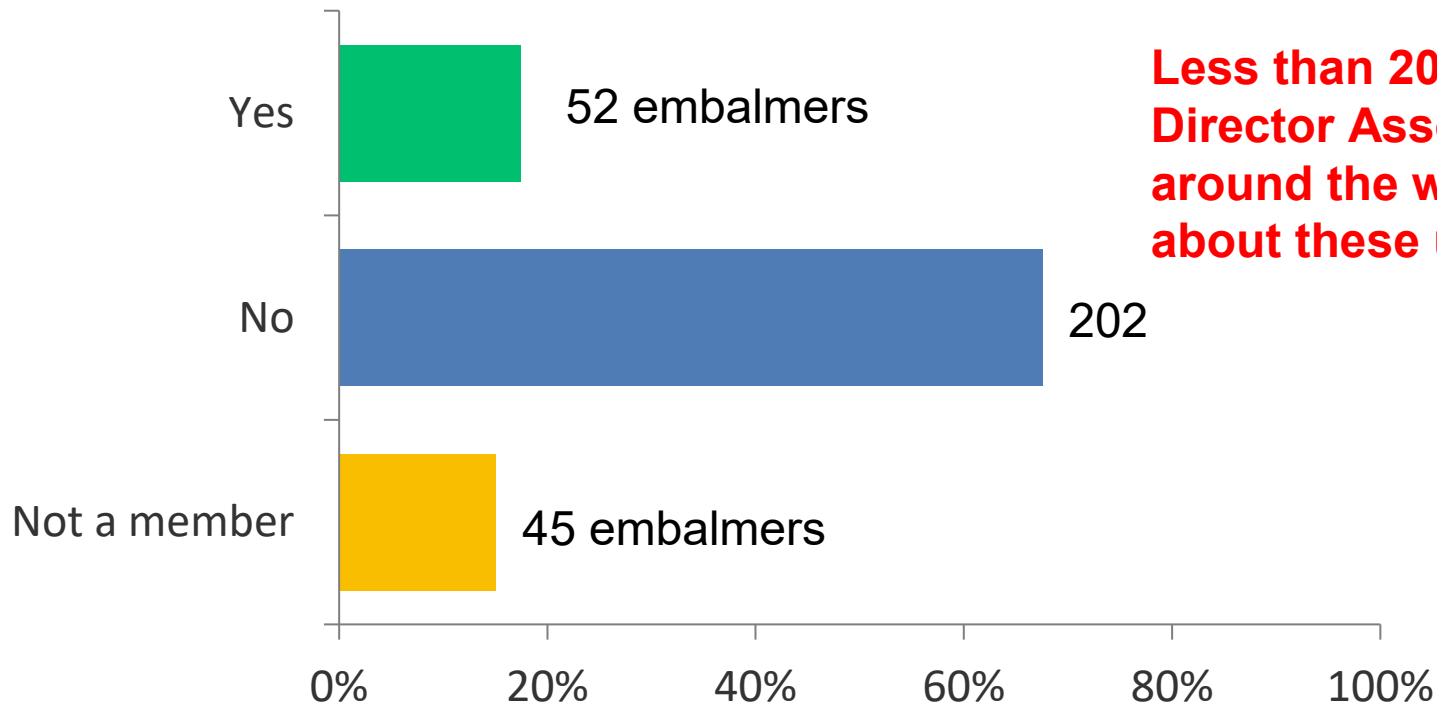

**Q3: What percentage of the corpses in the Year 2024 that you have embalmed have had the large whitish "fibrous" structures/clots? (Please select only one answer.)**

# Q10: Has your professional embalmer or funeral director association ever discussed the large whitish "fibrous" structures/clots?

**Less than 20% of Funeral Director Associations around the world are talking about these unusual clots.**

8<sup>th</sup> July 2024

Dear Mr Haviland.

Thank you for your email of 29<sup>th</sup> June 2024.

Firstly, may I apologise if I inadvertently did not reply to your earlier request about your survey.

I have received many, many email enquiries about potential new types of blood clots over the last few years. I have tried to reply to every one of these with an individual reply, rather than a standard one. At times like a few weeks ago, I did spend several hours replying to a sudden rush of emails. There appears to be a pattern of having nothing for weeks then suddenly getting a lot of queries.

Regarding requests for sending out any surveys, I did take this to National Council, which is our ruling body. After discussion they agreed that the BIE will only send out surveys from recognised sources such as HSE to mention just one. We are a small Institute and do not have the staff to cope with sending out numerous outside items.

# Embalmers' Anonymous Survey “Comments”

**KENTUCKY-** I've been an embalmer since early 2000's for an embalming service I have never seen anything like this before spring of 2021. I have experienced the white furious clots that have stretched out to 20". It's like battling a rubber band. My right hand and elbow has suffered from these clots. I've been saying for the last 3 years "this isn't normal" I've recently spoken with a physician that has been hearing this in his field. We are in the same agreement in that we feel we know where this has come from.

**IDAHO-** Sometimes I am given the information about if someone has had a certain vaccine. Sometimes I am aware they have had 5-6 doses of it. These are the people we are seeing with the abnormal clots or significant amount of clots.

**VIRGINIA-** I'm finding a lot of the white rubbery clots and had been taking pictures of them but it's become the new normal.. I don't use a drain tube anymore because of all the clots. blood clots and the fibrous white ones. My angular forceps is my to go instrument to help remove them..

**CANADA-** Since the beginning of the COVID-19 pandemic (which I assume this survey is pertaining to) I have not noticed any clots, fibrous structures, or contents in the blood outside of the ordinary. It is also not our responsibility as embalmers to take note of these cases, record or share any information as it is confidential medical information that breaches the privacy clause we have with our client families. Videos and articles such as "Died Suddenly" are anti-vaccine, COVID denying propaganda that is based in no actual fact other than to spread right-wing beliefs and fearmongering the public.

### Q3: What years (mark ALL that apply) have you or the person that you know had these blood clotting issues?

## Q7: The blood clotting issue was in what part of the body? (Mark ALL that apply)

Surgical nurse seeing a huge increase in clots We are doing more amputations than I've seen in my whole career I am definitely seeing the clots you are describing when I say it is probably due to the Covid shot everyone ignores me and there is silence in the operating room. I also hear the surgeons saying I've never seen this before Also, during heart surgeries, the surgeons are having difficult time suturing as the tissues are just falling apart Once again, the surgeons are saying I've never seen anything like this before A lot of the patients are dying.

I was feeling fine. Had pain left side below shoulder blade. Started sweating and feeling weak. Called the ambulance. ECG did not show heart attack. Rushed to emergency. ECG did not show heart attack. 3 different emergency Dr did ECG and Ultrasound. They were all perplexed. A cardiologist was called. I went sent to Heart institute. Arriving there I went into cardiac arrest. Was out 2 minutes. 3 sets of compressions and 4 defibrillator shocks used. They went in through artery at the wrist. They removed fibrous clot. They did not want to tell me but a nurse whispered to me: it is the vaccine. We have so many. Follow up appointment with cardiologist, I asked the question directly. Dr looked down and said, I cannot talk about it at The risk of loosing my job.
